## FOR CONSTRUCTION

Building Trust... Delivering Quality

## About Us

RAC for Construction is a contracting company specializing in general construction and infrastructure works. We execute civil, finishing, mechanical, HVAC, and fire-fighting projects, delivering high-quality works with precision and efficiency in line with recognized construction standards and supporting sustainable urban development.

# Our Vision

To be a leading construction company, contributing to a modern and sustainable built environment.

# Our Mission

---

To deliver high-quality engineering projects in line with international standards, ensuring safety and client satisfaction through efficient solutions and qualified professionals.

# Our Values & Objectives

We are guided by a set of values that define our organizational culture:

- Quality and precision in execution.
- Commitment to deadlines.
- Transparency and integrity.
- Continuous development.
- Teamwork and collaboration.

# Management Structure

RAC for Construction operates through an integrated management structure that supports efficiency and control

- **General Management** – Sets the company's direction and monitors overall performance.
- **Project Management** – Plans projects, oversees execution, and ensures quality.
- **Engineering Department** – Develops technical solutions and supervises designs in line with international standards.
- **Procurement Department** – Provides materials and equipment from trusted suppliers at optimal cost.
- **Financial & Administrative Department** – Manages financial and administrative resources with transparency and stability.

# Our Team

Our team includes a group of highly qualified engineers and technicians who combine experience with ambition. We believe that human capital is the cornerstone of success; therefore, we invest continuously in skill development through training programs and a supportive work environment that encourages collaboration and initiative.

# Fields of Work

RAC for Construction operates in multiple areas within the general contracting sector, including:

- Demolition Works.
- Electromechanical Works.  
(Plumbing- Fire Fighting – HVAC .....etc)
- Finishing and Interior Works.
- steel and Aluminum Works.
- Structural and Concrete Works.
- Architectural Exteriors

# Electromechanical Department

The Electromechanical Department executes electrical and lighting works, HVAC, plumbing, drainage, and fire alarm and fire-fighting systems. We follow international standards to ensure reliable operation and easy maintenance.

# Finishing Works

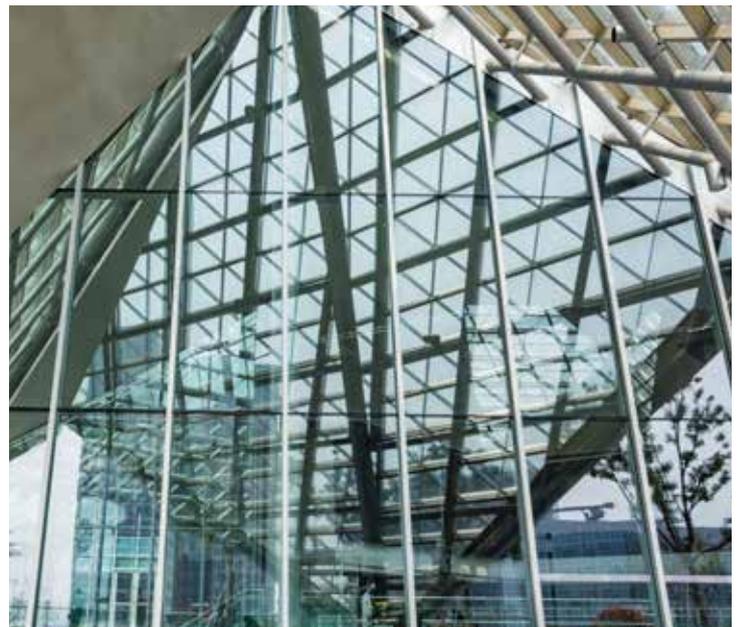

We deliver high-quality interior and exterior finishes, turning spaces into refined and functional environments.

Our expertise covers flooring, painting, gypsum, and premium finishes for residential, commercial, and hospitality projects.

# Steel & Aluminum Works

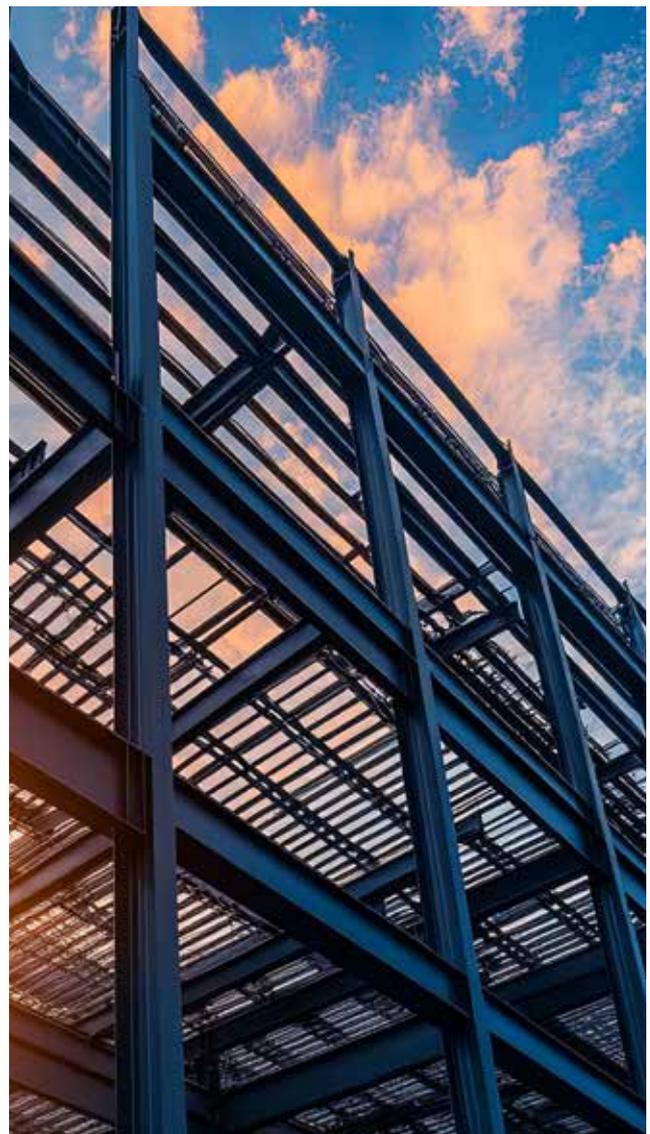

We provide premium steel and aluminum solutions, including doors, windows, glass facades, railings, structural elements, and warehouse structures, combining safety, durability, and aesthetic excellence.

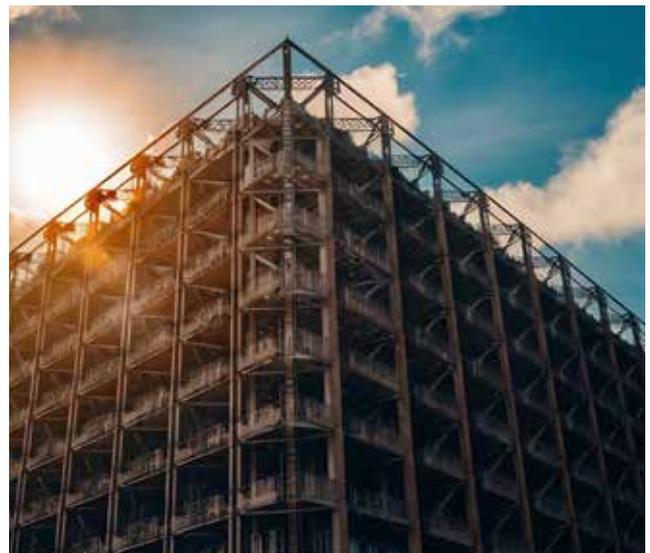

# Structural & Concrete Works

Our Structural Department forms the backbone of every construction project, executing foundations, columns, slabs, and complete concrete frameworks with precision and expertise. We apply rigorous engineering standards and use certified, high-quality materials to ensure long-lasting strength, safety, and superior workmanship.

We pride ourselves on delivering durable and reliable structures that meet the demands of modern construction and support the overall quality of the project.

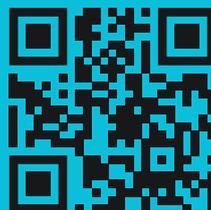

# Architectural Exteriors

We create modern and unique building exteriors that reflect the character of each project. Our work includes glass curtain walls, aluminum composite panels, and natural or engineered stone cladding, all designed for durability, thermal performance, and visual appeal.
